### 3i Group plc

## 3i Group plc announces Interim results for the six months to 30 September 2003

For further information regarding the announcement of 3i's interim results to 30 September 2003 please see <a href="https://www.3igroup.com">www.3igroup.com</a>

### 6 November 2003

### Results

- Positive total return of £359 million
- Return on opening shareholders' funds of 12.2%
- Diluted net asset value per share of 534p
- Realisation proceeds of £503 million and realisation profits of £129 million over opening valuation
- Significant reduction in the level of provisions to £65 million
- Investment of £273 million (including co-investment funds managed by 3i)
- Recommended interim dividend of 5.1p per share, an increase of 4.1%

Baroness Hogg, chairman of 3i Group plc, said:

"This encouraging performance was driven by better results in all of our key areas of activity - buy-outs, growth capital and early stage technology."

### Financial Overview

- The Group achieved a positive total return of £359 million for the six months to 30 September 2003; a return on opening shareholders' funds of 12.2%.
- Realised profits totalled £129 million. The aggregate uplift on equity realisations over 31 March 2003 valuations, net of losses, was 61%.

- A net cash inflow of £225 million during the period results in gearing being reduced to 25% at 30 September from 35% at 31 March 2003. €550 million was raised through the issue of convertible bonds.
- Investment of £273 million (including co-investment funds) compares with £393 million for the same period last year.

Commenting on the performance and outlook, 3i's chief executive, Brian Larcombe, said:

"We have seen a strong turnaround in 3i's financial performance, as the benefits of changes to the business over the last two years have flowed through. With positive returns, a strong balance sheet and increasing corporate activity, 3i is well placed to increase investment."

- ends -

### Notes to editors

3i brings capital, knowledge and connections to the creation and development of businesses around the world. It invests in a wide range of opportunities from start-ups to buy-outs and buyins, focusing on businesses with high growth potential and strong management.

3i invests in businesses across three continents through local investment teams in Europe, the US and Asia Pacific. To date, 3i has invested over £14.5 billion (including co-investment funds).

### Chairman's statement

In October, 3i's European Enterprise Barometer indicated that business confidence amongst the companies in which we invest was at its highest level for three years. 3i's own half-year results, for the six months to 30 September, were the strongest since 2000. The total return was £359 million, an encouraging performance, driven by better results in all of our key areas of activity – buy-outs, growth capital and early stage technology.

The Directors have announced an interim dividend of 5.1p, representing an increase of 4.1%.

During a period in which share prices, including 3i's own, rose markedly, the FTSE All-Share index increased by more than our net asset value. Total return on opening shareholders' funds of 12.2% compared with an index return of 19.0%.

Provisions were significantly lower than a year ago. But we have continued to take a cautious approach to the valuation of our early stage technology portfolio. We have made some further individual downward "fair value" adjustments, while not adjusting the total upwards for the rise in technology market indices.

However, we were able to take advantage of the improvement in markets to achieve a good level of realisations across the business as a whole, yielding profits of £129 million on proceeds of £503 million. Combined with the low level of investment during much of this period, this resulted in a positive cash flow in the half-year of £225 million.

3i's combination of financial strength, international network and in-depth expertise enables us to take advantage of opportunities in a range of different markets, and to add value to those companies in which we invest.

As business confidence rose towards the end of the half-year, so too did our levels of investment. Signs of growth in the world economy offer the prospect that momentum will build in our markets through the second half of the year. There are still threats to business confidence, with structural imbalances in a number of the major economies. However, we believe these markets will provide some excellent opportunities for 3i, and we will continue to be rigorous and selective in our approach.

### **Baroness Hogg**

Chairman 5 November 2003

### Operating and financial review

### **Economic and market conditions**

After almost two years of geo-political and economic uncertainty and difficult stock markets, we have seen signs of stronger economic activity. This has been evidenced by a number of indicators, including our own Barometer survey of business confidence across Europe.

The Barometer survey taken in March 2003, which was affected by the considerable anxiety over the Iraq war, produced a record low score of minus 117. Our survey covering August showed a significant improvement to minus 17 and our latest survey, taken in October, came out at plus 11, the first positive result since the end of 2000.

The period also saw strong growth in stock market indices, in anticipation of growth in corporate profits. In addition, the level of mergers and acquisitions ("M&A"), a key driver of activity in our market, picked up through the summer after being at a subdued level since 2000.

The private equity and venture capital markets are also starting to show increased activity after a slow first half of 2003. Market statistics for the first half show aggregate European investment 8% down on the first half of 2002, with buy-outs being flat, growth capital being down 24% and early stage investment down by 18%. Market statistics for the US venture market for the second quarter of 2003 showed a slight increase in investment levels after a two and a half year decline.

Conditions for realisations were difficult for most of the period, though we are now beginning to see the re-emergence of trade buyers as corporates re-enter the M&A market. There are also indications that IPO markets, particularly in the UK and US, may be re-opening.

### Total return

The Group achieved a positive total return of £359 million for the six months to 30 September 2003, which equates to 12.2% on opening shareholders' funds. This return is lower than those on a number of quoted market indices, largely because of a lag in recognising value increases in our portfolio. Only our quoted assets and unquoted investments valued using the earnings basis are directly linked to stock market movements. These made up 6% and 24% respectively of our opening portfolio.

The main drivers of our total return were a good level of profitable realisations and growth in the value of our portfolio, the latter being primarily due to higher price-earnings ratios ("P/Es") used to value our investee companies.

Improved results in each of our business areas underpinned the overall Group return. Returns in the smaller buy-out and growth capital businesses, aided by good levels of realisations, were particularly strong at 15% and 13% respectively on the opening portfolio. The mid-market buy-out return of 8% included a number of significant valuation uplifts on recent investments as they moved from being valued on a cost basis for the first time. Our early stage technology business produced a small negative total return despite some profitable realisations and a significantly lower level of value reductions. Although there was a significant rise in quoted technology indices during the period, we have not increased the valuations of early stage technology investments unless there has been a financing "up round".

### Investment

We invested £273 million, including co-investment funds, which compares with £393 million for the equivalent period last year. The period of economic uncertainty during the latter half of 2002 and the early months of this year led to a deferral of many strategic decisions by businesses and investors. This lowered our new investment pipeline coming into the period. Since then, economic confidence has improved and corporate activity has risen.

Buy-out transactions represented 51% of our investment and growth capital 28%. Early stage technology represented 21%, with 80% of this to support existing portfolio companies.

Continental European investment rose to 67% of total investment following several significant buy-out investments. UK investment represented 23%, the US 7% and Asia Pacific 3%.

### Realisations

We generated realisation proceeds of £503 million and realised profits of £129 million. The aggregate uplift over 31 March 2003 valuations on equity realisations was 61%. Including sales and redemptions of loans and fixed income shares, 10% of the opening portfolio was realised.

Realised profits are stated net of write-offs of £25 million (2002: £32 million).

The majority of the realisations were from our smaller buy-out and growth capital portfolios.

### Unrealised value movement

The unrealised value movement on the revaluation of investments was £215 million, representing a strong improvement on the £701 million value reduction for the same period last year.

The weighted average P/E applied to investments valued on an earnings basis rose from 8.1 at 31 March to 10.7 at 30 September. The impact of increased P/E ratios generated value growth of £235 million. The quoted investments we retained increased in value by £44 million (2002: £192 million reduction).

A small number of recent investments in our mid-market buy-out portfolio generated most of the increase in value arising from "first time uplift".

Provisions for investments in companies which might fail were £65 million (2002: £141 million), and valuation reductions relating to down rounds and restructuring provisions fell significantly to £68 million from £130 million in the six months to 30 September 2002 and £361 million for the 12 months to 31 March 2003.

The British Venture Capital Association recently issued new best practice Valuation Guidelines. 3i adopted these guidelines at 30 September 2003. There was no material impact on the overall valuation of the portfolio.

### The portfolio

Following two difficult years, the health of our portfolio has stabilised. In line with our strategy, the portfolio remains balanced in terms of both product and geography. At 30 September, 53% of the portfolio is represented by buy-outs, 33% by growth capital investments and 14% by early stage technology investments. Geographically, 62% of our portfolio is in the UK, 32% in continental Europe, 4% in the US and 2% in Asia Pacific.

### Income and costs

Total operating income before interest payable was £130 million (2002: £153 million). The decrease from 2002 is a result of the realisation of a small number of higher yielding investments, a lower level of special interest receipts on the sale or restructuring of assets and a fall in deal-related fees due to the lower level of investment activity.

Net interest payable has decreased in line with the reduction in net borrowings.

Management expenses were £6 million lower than in the same period last year, as cost reduction measures taken over the past two years continue to work through.

### Cash flows and capital structure

There was a net cash inflow of £225 million during the period. We raised €550 million through the issue of convertible bonds in August. The bonds are due in 2008 and have a conversion price of 842p (a 45% premium to the "reference price" of 580p) and an annual coupon rate of 1.375%. Net borrowings decreased by £206 million and our gearing reduced to 25% at 30 September from 35% at 31 March.

### Outlook

Improving business confidence, rising stock markets and increased levels of M&A activity are helpful to our industry. In addition, within each of 3i's businesses there are specific factors indicating a more positive outlook – in buy-outs, the continuing pressure on corporates to focus on their core activities is generating opportunities and vendors' pricing expectations are now more realistic; in growth capital, opportunities are being created as businesses re-launch deferred growth strategies; and, in early stage technology, we are starting to see increased levels of technology spending in some sectors by major corporates.

Our new investment pipeline is currently strong and we expect to increase investment levels in the second half.

### **Brian Larcombe**

Chief Executive 5 November 2003

<sup>\*</sup>In the year to 31 March 2003, the Group adopted the recommendations in the revised Statement of Recommended Practice – Financial Statements of Investment Trust Companies, and revised the method of allocation of expenses between revenue and capital. To aid comparability, the comparatives to 30 September 2002 have been restated to reflect these changes and are included as a "pro forma" above. These changes are explained in more detail in the Basis of preparation.

### Basis of preparation and independent review report

### Basis of preparation

The accounting policies used in the preparation of this Interim report are the same as those used in the statutory accounts for the year to 31 March 2003 and those expected to be used for the year to 31 March 2004.

The six month period is treated as a discrete period except in so far as tax in the revenue account is charged on the basis of an estimated annual effective rate.

The figures for the year to 31 March 2003 have been extracted from the accounts filed with the Registrar of Companies on which the auditors issued an unqualified report. This Interim report does not constitute statutory accounts.

In the year to 31 March 2003, the Group adopted the recommendations contained in the revised Statement of Recommended Practice – Financial Statements of Investment Trust Companies, issued in January 2003. Fee income and costs earned or incurred as an intrinsic part of an intention to acquire or dispose of an investment have been accounted for in full as part of capital return. To the extent taxation losses have been transferred between capital and revenue in order to be utilised against excess taxable profits, the transfer is reflected in the Statement of total return and Revenue statement. In the year to 31 March 2003, the methodology used to identify the administrative expenses available for allocation to the capital reserve was modified. The methodology for allocation of finance costs has also been revised to allocate all finance costs less interest income between capital and revenue. The proportion of costs allocated to the capital reserve was decreased from 80% to 70%. Consequently, to aid comparability, a pro forma of the Revenue statement has been presented to show the results as if these changes had been adopted for the six months to 30 September 2002.

### Independent review report to 3i Group plc

### Introduction

We have been instructed by the Company to review the financial information for the six months ended 30 September 2003 which comprises Consolidated statement of total return, Movement in shareholders' funds, Consolidated revenue statement, Consolidated balance sheet, Consolidated cash flow statement and the related notes 1 to 3 and the Basis of preparation. We have read the other information contained in the Interim report and considered whether it contains any apparent misstatements or material inconsistencies with the financial information.

This report is made solely to the Company in accordance with guidance contained in Bulletin 1999/4 'Review of interim financial information' issued by the Auditing Practices Board. To the fullest extent permitted by law, we do not accept or assume responsibility to anyone other than the Company, for our work, for this report or for the conclusions we have formed.

### Directors' responsibilities

The Interim report, including the financial information contained therein, is the responsibility of, and has been approved by, the Directors. The Directors are responsible for preparing the Interim report in accordance with the Listing Rules of the Financial Services Authority which require that the accounting policies and presentation applied to the interim figures should be consistent with those applied in preparing the preceding annual accounts except where any changes, and the reasons for them, are disclosed.

### Review work performed

We conducted our review in accordance with guidance contained in Bulletin 1999/4 issued by the Auditing Practices Board for use in the United Kingdom. A review consists principally of making enquiries of group management and applying analytical procedures to the financial information

and underlying financial data, and based thereon, assessing whether the accounting policies and presentation have been consistently applied unless otherwise disclosed. A review excludes audit procedures such as tests of controls and verification of assets, liabilities and transactions. It is substantially less in scope than an audit performed in accordance with United Kingdom Auditing Standards and therefore provides a lower level of assurance than an audit. Accordingly, we do not express an audit opinion on the financial information.

### **Review conclusion**

On the basis of our review, we are not aware of any material modifications that should be made to the financial information as presented for the six months ended 30 September 2003.

Ernst & Young LLP London 5 November 2003
